

## Shivalik Bank launches AEPS facility

---

**30 July 2016**

Taking one more step towards digital revolution in the country, your favourite Shivalik Bank has launched Aadhar Enabled Payment System (AEPS) facility to empower its customers with state-of-the-art technology. Now a customer having a Aadhar-linked account in Shivalik Bank can use finger prints and other info to establish his/her identity to be able to access the bank account and perform various transactions like depositing cash, withdrawals, balance enquiry, mini statement of account, fund transfer etc.

It may be noted here that Shivalik Bank's representatives are already providing banking services at the doorstep of the people living in rural and urban areas with the help of a micro ATM given to each of them by the bank. The machine, connected to the bank's system through internet, and equipped with digital camera, biometric identification system, a printer and card swiping mechanism makes it possible to open accounts of customers, deposit and withdrawal of cash, fund transfer, balance enquiry, mini statements etc. A customer's Aadhar Card can now be linked at the time of opening of the account so that in future transactions, identity of the customer can be established with the help of biometric system.

Thus, Saharanpurians have got one more reason to feel proud of their Shivalik Bank. There are very very few cooperative banks in the country, which are offering such advanced technology based customer service to their clients and Shivalik Bank is looked at with great respect at national level for its quality of customer service. How do you feel about it?

The bank has expressed its gratitude towards the media for picking up the news and publishing it prominently.
